01

ABOUT US

A vibrant team, lead by IIT graduates with in dept tech skills, service orientation and camaraderie

About Us

1

Financials

250 crores revenue with continuous growth since inception

2

ISO

ISO 14001, 9001, & 27001 certified and on the way for CMMI certification

3

Retention

>97 retention of clients since our inception in the year 2000

4

Camraderie

<10% attrition over the year in and environment which works as a family

5

500

plus resources spread across India and SE Asia. Our Technical skills makes us stand out

6

16+

office spread across India and SE Asia including strong presence in tier 2 cities

02

OFFERINGS

From insightful consulting services to in-depth deployment and project roll-out across tech domains

OFFERINGS

Application & Software

Expertise in Oracle stack, Automation, Data Protection & Virtualization solutions

Networking & Security

Enriching 18 plus years of security & network designing, consulting & deployment across OEMs

Consulting & Services

Cutting edge IT Infra and Cloud consulting services across spectrum of technology services

Systems & Infra

DC in Box or HCI -primary or Secondary storage. We bring in the difference with knowledgeable solutions

2.1

Application & Softwares

A consultative approach to software solutioning

Application & Softwares

Oracle Stack

Database, Middleware, Analytics
and Automation

BPM & Automation

Business process applications &
AI enables analytics

Cloud

IaaS, PaaS & SaaS solution
augmented with support Services.

Digital M & App Testing

Application testing and Digital
marketing services

Data Protection

On Premise & cloud data
protection solutions.

Virtualization

Compute, Network & Endpoint
virtualisation

Oracle Stack

1

Oracle Cloud

Cloud Infra & Applications, ERP
deployment, migration & support

2

Engineered Systems

Private Cloud, Database Appliance
Exadata Systems

3

On-Premise Software

Database, Middleware, Analytics,
Security, Virtualisation

4

Consulting & Managed Ser.

License management, Solution
designing, deployment and
integration support

BPM & Automation

1

Application Development

Mobile ready application development on low code platform

2

Process Automation

Digitalisation & Automation of process

3

Analytics & BI

Cloud based AI enables analytics solution

4

Integration & Support

Integration of legacy ERP with bespoke application developed by us

Data Protection

1

Entp. Application Backup

SAP, MS, VMs, Database and
appliance/software based backup

2

Cloud backup

G Suit, O365, SFDC, & Cloud based
solutions backup & recovery

3

Availability Orchestration

Democratize DR for any app, any
data –from replicas AND backups

4

Optimisation Support

Up-time, maintenance, installation
& troubleshooting services

Virtualisation

1

DC & Cloud Infra

Server, DC virtualisation & multi cloud integration for seamless operations

2

Storage Availability

Enhance and simplify storage architecture with SD storage tech.

3

Desktop Virtualisation

Run desktops and applications anywhere, scale quickly to meet changing business needs

4

Managed Services

Across platform support, maintenance and management services

Digital Mar. & SW Testing

1

SW Testing

UI, Software, Website testing, deployment and consulting services

2

Digital Marketing

Marketing, SEO, Social media management, DNS, Google analytics and Adwords management

3

Employee LMS

Employee on-boarding, training, skill development management

4

Event Automation

Centralized and automated event scheduling, webinar, collaboration management

Cloud

1

Infra on Cloud

Explore your Infra requirement on cloud with scalability & flexibility

2

SaaS & PaaS

Select the most suitable cloud for your enterprise software load

3

Advisory

Create a well researched roadmap to cloud with us

4

Migration & Integration

For heavy lifting of IT load from premise to cloud

2.2

Systems & Infra

Systems & Infra

Systems & Infra

Servers & Compute

Power, AIX or X86 or HPC solution for heavy duty ERP load or standard usage

Data Centre Solutions

Physical Infrastructure solution for entire DC & DR along with deployment and consulting services

Storages

HCI Infra for both primary & secondary storage across spectrum of usage

Mobility

Mobile security, Device management, and supply of hardware

PSS

Physical Security & surveillance system for integrated security & monitoring

Support Services

Deployment, maintenance and managed services for prospectus of Infra and hardware systems

Servers & Compute

1

Converged

Blade, Tower, Converged, or hyperscale, we design to suit you the best

2

Cloud Ready

Hybrid is the environment which is sustainable. We ensure your servers sync with hybrid environment

3

Power or SPARC

IBM power or Oracle Sparc, our certified experts make the difference you seek

4

Support & Maintenance

Spares, Maintenance and up-time support for all compute Infra

Data Centre

1

Power & Enclosure

Explore your Infra requirement on cloud with scalability & flexibility

2

Edge DC

Data-Centre in a Box for small and Soho office

3

Monitoring & Mgmt

Centralized monitoring of all devices connected in your DC/DR

4

Services

To keep your DC/DR working seamlessly

Storage

1

Primary

Be is converged or HCI or traditional, for all kinds of data or across OEMs.

2

Unstructured Data

Unstructured primary or secondary data across OEMs

3

Cloud Ready

Storage have to be cloud ready and work well in a hybrid environment

4

AMC & Support

For spares, uptime, and maintenance support across India

Mobility

1

MDM

Management of mobile devices for your business environment

2

Mobile Security

Keep you devices secure and protected from breach and data loss

3

One Workplace

Integrate you mobile with you compute environment to keep working seamlessly

4

Services

Mobile & MDM support and maintenance services

PSS – Physical Security & Surv.

1

PA & Comm

Intelligent communication solutions to integrate CCTV, access control and PA for a comprehensive soln.

2

Surv. Solution

Comprehensive surveillance system enabled with analytics and video monitoring

3

Security

Versatile, reliable and robust access control, boom barriers, IDS and monitoring systems

4

Services

Spares, managing and maintaining of solutions across India

Support Services

1

Hardware AMC

Maintenance & spares of all hardware across India

2

RiMs

Remotely monitor and maintain health of all connected hardware devices

3

SW Support Services

One time installation, or post deployment support for all business management softwares

4

IT FMS

IT Skilled resource deployment and uptime

2.3

Networking & Security

from legacy to cloud ready

Networking & Security

Networking

Cross platforms, Across OEMs, we design solutions based on your use case.

Network Security

Keep you environment security with intelligence policies and right practives.

VoIP

Data, Video or Voice, creating an IP platform which is flexible, controllable and cost effective

Wireless & Mobility

Seamless, robust and secure, we believe in bringing mobility with security

Collab & Conferencing

making video communication easy, effective and budget friendly

Support Services

Maintenance and up-time services for all your network, collab & voip solutions.

Networking

1

Switching & Routing

Ranging from core to catalyst we design the solution to give the best performance

2

Network Management

A good performance requires constant monitoring and optimizing the flow.

3

Analytics

Collecting the data from multiple devices to ensure rational decision making

4

Services

Maintenance and optimizing service support

Wireless & Mobility

1

True Wireless

Integrated wireless system for outdoor and indoor, managed from premise or cloud

2

Built for IoT

Through classification and segmentation, we keep IoT devices separate from your enterprise network

3

Comprehensive Security

Features that monitor the network and locate and mitigate security threats, giving you peace of mind.

4

Services

Maintenance and optimizing service support

Network Security

1

Perimeter Security

Integrated wireless system for outdoor and indoor, managed from premise or cloud

2

Security Management

As perimeters change and systems get more interconnected, we help you safely access internet

3

Security O&M

Orchestration & Management to transform SOC with scalable, automated processes

4

Services

Maintenance and optimizing service support

Network Analytics

1

IT/Network Monitoring

Network intelligence platform to enable your team better manage, secure, and optimize your network

2

Performance Mgmt

Effective network and application performance management with in-depth visibility

3

WAN Optimisation

Orgs with distributed WANs, we monitor resource consumption and prioritize business-critical applications

4

Security Opr.

Maintenance and optimizing service support

Services

1

Solution Designing

Active & Passive networking designing for seamless communication

2

Performance Mgmt

Effective network and application performance management with in-depth visibility

3

Passive

Passive solution designing with diligent deployment

4

Spares and support

Maintenance and optimizing service support

2.4

Consulting Services

Across the OSI layer

Consulting Services

Oracle Consulting

Advisory services for the entire spectrum of Oracle stack

Network Consulting

Creating a network from scratch which is future ready, secure and flexible and keeps your business running 24x7

Data Management

Data is your business fuel, we help create an environment which protects and ensure seamless availability

Data Center Consulting

DC/DR certification, performance monitoring and need analysis based on business usage

System & Compute

Systems and compute ensure application performance. Designing the infra landscape which give your application to perform to the best

Security & Surveillance

Physical security and surveillance is one domain which need expertise on entire OSI layer. A one stop consulting window for critical projects

Our Pillars of Consulting

Strong Domain Skills

With more than 40 years of team experience, across multiple domains, we provide a systemic view of the problem and approach thereof

Business Understanding

Any consulting without business knowledge does not result into profit. We approach our advisory service with business goal in mind

Implementation

A report which is hard to implement is just an exercise. Our endeavour is to ensure implementability and result oriented

Academia

With best of academic minds, we bring the latest cases from the world and couple it with the business to bring the optimal outcome

03

ALLIANCES

Partnerships which makes the difference

NEO SKILLS

Emerging skills and expertise for dynamic business landscape

NEO SKILLS

Digital Transformation

Business environment is changing fast and so is the need to change course. Transformation is a difficult and laborious process requiring in-depth knowledge of academia and business canvas. We help transform business in a way market demands

AI & Data Science research

Enabling process and systems with AI and taking decisions based on Data is a must. However it is not easy to do it and requires good understanding of statistics, probability and software development

Cyber Security Consulting

When the business world is running on IP, cyber threat has the potential to bring even the best business to a sudden halt. From policy to implementation, we provide the security advisory services to keep you business secure and monitor it continuously.

THANK YOU

HQ: 9th Floor, Block BP, Plot 7, Salt Lake
Kolkata, WestBengal
